### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Chris Lipp on November 29, 2004.

The application has been amended as follows:

15. (Currently Amended) ~~An~~ The image output processor ~~for receiving image data transmitted from a plurality of data processors connected to the image output processor and for outputting the image data to a printer having a plurality of sorter bins, the image output processor comprising:~~ as claimed in claim 1, wherein the data transmission source identifying means for uniquely identifying identifies one of the data processors as [[a]] the data transmission source of image the data received by the image output processor by extracting originating device data from tag data transmitted received by the image output processor prior to the image data received by the image output processor; and

~~sorter bin determining means for determining which sorter bin to output the image data received from the plurality of data processors based on the data transmission source identified by the data transmission source identifying means.~~

Art Unit: 2622

16. (Currently Amended) ~~An~~ The image output processing method for receiving image data transmitted from a plurality of data processors connected to an image output processor and outputting the image data to a printer having a plurality of sorter bins, the image output processing method comprising the steps of: as claimed in claim 11, wherein the step of uniquely identifying one of the data processors as [[a]] the data transmission source of image data received by the image output processor by comprises extracting originating device data from tag data transmitted received by the image output processor prior to the image data and uniquely identifying one of the data processors as the data transmission source based on the originating device data received by the image output processor; and

~~determining which sorter bin to output the image data received from the plurality of data processors based on the data transmission source which has been identified.~~

### ***Allowable Subject Matter***

2. Claims 1-7, 9-12, 15-17, 19-20 and 22 are allowed in respect to the amendment filed on October 29, 2004 in response to the After Final and the examiner's amendment prepared above.

3. The following is an examiner's statement of reasons for allowance: The prior art and the prior art of record specifically Katakura, Ohara and Yamada do not disclose uniquely identifying one of the data processors according to a communication protocol used to transmit the data as similarly argued by the applicant on pages 11 and 12 of the October 29 amendment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
